

Aims and Objectives of **Exams Assist**

Refine the Processes and Save Significant Money

Use Exam Room Viewer at no additional cost to eliminate the need to purchase clocks, whiteboards and stationary. Parents/Candidates can access the free online portal to view entries, access arrangements and exam timetables for any season. Exams Assist reduces the amount of printing incurred during an exam season, thus making significant savings possible.

Save Time

When developing Exams Assist, our aim was to create a solution that would save time for ALL school users and not just the Examinations Officers. This solution contains benefits for a wide range of stakeholders from staff, parents and the candidates at a centre.

Meets JCQ Regulations

Accurate seating plans, with colour identification for different exams and various icons to represent the access arrangement candidates in an exam room. The ability to produce component cards which can include the candidate's photo for identification purposes if required.

Help Reduce the Risk of Malpractice

This solution helps schools reduce the risk of malpractice – identification of exams with clashes, built in clocks to work out multiple end times from extra time, supervised rest breaks and late candidates.

Safeguarding

Instantly knowing the location of a candidate and if the candidate is present in the exam. Any issues with a candidate can be displayed on the Invigilators devices.

Reduce your Carbon Footprint

Reduce the amount of paper generated during an exam season by recording all information electronically.
